MICHAEL VICTOR

Software Engineer

radmakson@gmail.com | github.com/yourmix0x

PROFESSIONAL SUMMARY

Software engineer focused on building fast, reliable web apps with React and Next.js. Experienced in Solidity smart contracts and web3 integrations, delivering end-to-end features with clean execution and strong performance.

EDUCATION

Federal University of Technology Akure, NG.   June 2023 - August 2027

Bachelor of Technology in Remote Sensing and GIS

Relevant Courses: Remote Sensing Principles, Algorithms and Data Structures, Programming Fundamentals

RELEVANT EXPERIENCE

Frontend Engineer, **nexorà**   November 2024 - Present

- ❖ Worked on multiple projects including SalvageYard, an ecommerce marketplace with buyers, sellers, payments, and a full product management flow.
- ❖ Delivered client projects to specification, achieving strong satisfaction ratings and reducing revision cycles by roughly 50%.

Frontend Engineer, **PineApp Solutions**   August 2025 - December 2025

- ❖ Fixed critical bugs and implemented new features across existing products, improving stability and meeting CEO and PM requirements.
- ❖ Collaborated with the team lead to optimize UI flows and enhance performance, improving user experience by an estimated 60%.

Frontend Lead, **Nel Professionals** (Contract)   July 2025 - October 2025

- ❖ Co-developed a two sided platform for clients and professionals with account creation, proposal workflows, milestones, and project automation.
- ❖ Integrated Stripe Identity and Stripe Cards to enforce verification and secure job posting, boosting trust and reducing fraudulent attempts by an estimated 70%.
- ❖ Built the admin dashboard to manage users, jobs, payouts, reports, and platform operations with improved oversight and faster issue resolution.

Tech Lead | Software Engineer, **Aquaorg** (Part-time)   January 2023 - September 2025

- ❖ Built the web app that secured a grant worth $500, driving early traction and validating core product features.
- ❖ Developed the scholarship waitlist platform that onboarded 500+ users within the first rollout.
- ❖ Implemented key software systems across frontend and backend, improving product stability and reducing operational overhead by an estimated 40%.
- ❖ Handled architecture decisions, deployments, and feature delivery, speeding up development cycles by roughly 60%.

FEATURED PROJECTS

Personal Website: www.yourmix0x.dev (for more projects).

Nel Professionals (*nelprofessional.com*)

- ➢ Platform for clients and professionals with account creation, proposal workflows, milestone funding, stripe identity verification, payment linking, and automated project transitions.
- ➢ **Tech**: Next.js, Typescript, Stripe js, Tailwind CSS, Figma, API Integration

nexorà (*nexora-x.dev*)

- ➢ Worked on multiple company projects including SalvageYard, an ecommerce platform with buyers, sellers, product listings, and integrated payments. Contributed to core feature delivery and api driven flows.
- ➢ **Tech**: Next.js, Typescript, Tailwind CSS, API Integration

SKILLS

Technical: Javascript, Typescript, React, Next.js, Solidity, Node.js, Express, Tailwind CSS, React Native

Tooling: Git, Docker, Vite, Webpack, Turborepo, CI/CD pipelines, Stripe js, Figma

Competencies: Smart contract development, Web3 integration, API design, Performance optimization, State management, Testing, Frontend system design, Analytics instrumentation
